1. (U) Forwarded herewith is a DRAFT Volume IV (Intelligence and Security) of the Army Intelligence Survey of Somalia for review, Inclosure 1.
2. (U) The submitted draft is an update of an earlier draft which was reviewed by you in early 1983 but which was not published. The 1983 draft included data from CIA reporting which you concurred could be published without the ORCON caveat. The new draft contains additional, subsequent data from CIA reporting. All new information derived from CIA reporting is color-highlighted and footnoted by number in brackets (e.g., [1], etc.) to facilitate your review. The footnotes refer to specific CIA reports, listed separately at the end of the draft, which were used as source material for the highlighted data. Be assured that the bracketed footnotes will not appear in the published version of the study. Only finished CIA intelligence reports (not individual field reports) will appear in the study's bibliography. As in the case of the 1983 draft, request your concurrence that the new draft may be published without the ORCON caveat.
3. (U) To further facilitate your review, a copy of the original, unpublished 1983 draft is included, complete with a listing of the CIA reports that formed part of its source material; Inclosure 2.
